

SUMMARY OF INTERVIEW

We acknowledge and thank the Examiner for the telephonic interview conducted on November 19, 2008 with the undersigned representative. During the interview, a set of proposed claim amendments were discussed with reference to the Advisory Action of October 22, 2008 and the obviousness rejections of claims 1 and 11 over U.S. Patent No. 4,408,251 to Kaplan in combination with U.S. Patent No. 3,337,992 to Tolson and over Kaplan in combination with U.S. Patent No. 5,576,670 to Heitschel. The undersigned argued that the proposed claim amendments overcame the proposed combination of Tolson and Kaplan. The Examiner stated that Tolson is relied upon primarily for demonstration of the wireless feature. The teachings of Kaplan were discussed. The combination of Kaplan and Heitschel was also discussed. No agreement was reached as to the allowability of the claims.
